PROFILE

A bit about me

I take pride in my ability to translate ideas through design and code the design up properly. But my personal skills are what really round out my designer skillset: I listen intently; I ask questions; I persuade and recommend; and I think about the user at all times. Also, I need to know *why*. What is the why behind the project? The interface? The copy? My work is best when there is value behind every pixel. I work diligently to get to that why.

EXPERIENCE

Where I've been

BLOCK 81 Owner / Independent Designer | 2003 – present

Plan, manage, create, and deliver a broad range of branding and web projects for a variety of clients.
